

**Food Assistance and Nutrition Research Small Grants Program: Executive Summaries of 2000 Research Grants.** By Ann Vandeman (editor). Food and Rural Economics Division, Economic Research Service, U.S. Department of Agriculture, Food Assistance and Nutrition Research Report No. 20.

## **Abstract**

This report summarizes research findings from the Food Assistance and Nutrition Research Small Grants Program. The Economic Research Service created the program in 1998 to encourage new and innovative studies of food security, hunger, and public- and private-sector efforts to alleviate these problems among low-income residents of the United States through food and nutrition assistance. The report includes summaries of the second set of small grants, which were awarded for 1-year research projects in the summer and fall of 1999.

**Keywords:** Food assistance, nutrition

## Preface

The Economic Research Service's Food Assistance and Nutrition Research Program (FANRP) offers small grants to social science scholars to stimulate new and innovative research on food and nutrition assistance and to broaden participation in research on these issues. To administer the program, ERS partners with five academic institutions and research institutes that competitively award grants for 1-year research projects. Most grants are for \$20,000 to \$40,000. The Small Grants Program seeks to give junior scholars an opportunity to gain experience in conducting food security and food and nutrition assistance research, as well as to encourage more senior scholars to apply their skills and knowledge in these areas.

This report presents summaries of the research findings from the second set of small grants, which were awarded in the summer and fall of 1999. Preliminary findings were presented at a workshop at ERS in Washington, DC, on October 19 and 20, 2000. More information about the Small Grants Program partners and many of the completed research papers can be found on the Web sites of the administering institutions, listed below:
